

Chris Butler Archaeological Services Ltd

Woodland Archaeology Specialists

CBAS Ltd are one of the leading specialists in large landscape and woodland surveys in South-East England. Groundbreaking work by CBAS, in conjunction with Vivienne Blandford and Anne Locke, has been carried out using LiDAR to identify potential sites in woodland across the Weald, and then confirming their presence with ground-truthing field visits.

We have carried out major surveys of Ashdown Forest, which identified some 500 new sites, as part of a review of the Historic Environment Resource and to provide Conservation and Management recommendations for the Ashdown Forest Higher Level Stewardship Agreement. Surveys have also been carried out for the RSPB at Broadwater Warren and Tudely Woods near Tunbridge Wells; for The Sussex Wildlife Trust at Old Lodge; and for the Forestry Commission in East and West Sussex, as well as other surveys for private landowners. Recent work at Broadwater Warren has seen CBAS monitoring extensive forestry work, to advise the contractors on how to avoid damaging the known archaeological sites, and working with them to record and protect newly discovered sites that emerge during the work.
